PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building **end-to-end, production-ready web applications** using the **MERN stack**. Proven ability to take ownership of features from idea to deployment in **startup-like environments**. Strong in **API design, authentication, cloud deployment, real-time systems, and AI integrations**. Passionate about solving real-world problems, shipping fast, and building scalable products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Python, Java

Frontend: React.js, Next.js, Redux, TailwindCSS, TanStack Query, shadcn/ui

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, JWT Auth, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront, Load Balancer), Docker, CI/CD

Tools: Git, GitHub, GitLab, Postman, Vercel, Cloudinary, Multer

Other: WebSockets, Razorpay, Google Maps API, AI APIs (Gemini), Agile

EXPERIENCE

Full Stack Developer Intern | (LOR) TDS Avenue CodeForge (Aug 2024 – Jan 2025)

- Built **100% of frontend and backend** for *VidyaNexus*, a multi-role school management system (SuperAdmin/Admin/Teacher/Student).
- Designed secure REST APIs, implemented JWT authentication, and optimized MongoDB schemas.
- Developed backend services for *FreshPicked*, a vegetable delivery app, focusing on scalability and data integrity.
- Worked closely with founders/designers, taking ownership of features end-to-end.

Software Development Intern | TechWalnut Innovation LLP (Jan 2025 – Jun 2025)

- Developed **60% of frontend** for a Hospital Management System using reusable React components.
- Built a modern HRMS frontend with real-time data rendering and responsive UI.
- Improved performance and maintainability by following clean architecture practices.

Software Developer |Brain Inventory (August 2025 – Present)

- Developed **40% of frontend** for a **DriveG**, a file management System same as **Google Drive**.
- Contributed to the existing built **TableOpen** project by fixing the existing **bugs** in the application.
- Managed and reviewed the code of other developers for both the projects.
- Working as a contractor for the **TURING** Company as a Full Stack Software Developer.

PROJECTS

ColdMailerAi | 200+ Active Users | Gemini Api, MERN Stack | Live-link Github-link

- Built an AI-powered cold email generator used by students and sales professionals.
- Implemented email generation, editing, and history tracking with authenticated users.
- Designed scalable APIs and optimized frontend state management.

Hirrd | MongoDB, Express, React, Node.js, WebSocket | Live-link Github-link

- Developed a role-based job platform for candidates and recruiters.
- Implemented real-time features using WebSockets and JWT-based authentication.

EDUCATION

Government College of Engineering, Nagpur   Nagpur, Maharashtra
B. Tech in Electronics & Telecommunication - **7.24 CGPA**   *Nov 2022 – May 2025*
