Indore, Madhya Pradesh, India | +91 7385664978 | krushnasakhare965@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with experience across three engineering teams, building production React/Node applications used by hundreds of active users. Comfortable owning features end-to-end from API design through deployment with hands-on work in React.js, Next.js, Node.js, Express.js, MongoDB, AWS, and Docker, plus AI integrations using Gemini and OpenAI APIs.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Redux, Tailwind CSS, TanStack Query, shadcn/ui

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, Redis, WebSockets, JWT Auth

Cloud & DevOps: AWS (EC2, S3, CloudFront), Docker, CI/CD, Vercel, Render

Tools & Integrations: Gemini API, OpenAI API, Razorpay, Google Maps API, Cloudinary, Git, GitHub, Postman, Agile/Scrum

EXPERIENCE

Full Stack Developer — Brain Inventory (via Turing)

Aug 2025 – Present

- Selected through **Turing's developer vetting process** and placed with Brain Inventory to work on production-scale client applications.
- Contributed **25+ reusable React components** and **12+ API integrations** to DriveG's frontend, covering a significant share of the application's UI layer.
- Improved average page load time through lazy loading, API call optimization, and component-level rendering improvements.
- Resolved 20+ production bugs in TableOpen, reducing reported user-facing issues and improving platform stability.
- Participate in sprint code reviews within a 2 to 3 person Agile team**, consistently delivering sprint commitments on schedule.

Software Development Intern — TechWalnut Innovation LLP

Jan 2025 – Jun 2025

- Built a substantial share of the frontend for a Hospital Management System spanning **2 operational modules**.
- Developed 10+ reusable React components**, cutting development time for subsequent features.
- Built the frontend for an HRMS module (attendance, payroll, employee management) consuming **15+ API endpoints with real-time data rendering**, reducing manual HR reporting effort.
- Introduced a modular component architecture that shortened onboarding time for new developers and **reduced initial page load from 5s to under 3s**.

Full Stack Developer Intern — TDS Avenue CodeForge

Aug 2024 – Jan 2025

- Designed and implemented **20+ REST APIs** with **JWT authentication and role-based access control**.
- Optimized MongoDB queries and schema design (indexing, restructuring), measurably reducing average API response time.
- Built the backend for FreshPicked, supporting 3 user roles and concurrent access for 100+ users.
- Independently delivered **4+ features** from wireframe through deployment.

PROJECTS

ColdMailerAI | 250+ Active User | Gemini API, MERN Stack | • [Live Demo](#) • [GitHub](#)

- Built an AI-powered cold email generator that has grown to **250+ active users** across students, freelancers, and sales professionals.
- Added in-app editing, saved templates, and email history, improving repeat usage and user retention.
- Designed 12+ REST APIs** and tuned concurrent request handling to support 50+ simultaneous users.
- Reduced redundant frontend API calls by 35% using TanStack Query caching and optimized state management.

EDUCATION

Government College of Engineering, Nagpur

B.Tech in Electronics & Telecommunication Engineering — CGPA: 7.24

Nagpur, Maharashtra

Nov 2022 – May 2025
