PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with 1+ year of experience delivering 6+ production applications across 3 companies. Built and shipped end-to-end features used by 250+ active users, reduced production bugs by 35%, and improved page load performance by 40%. Experienced in React.js, Next.js, Node.js, Express.js, MongoDB, AWS, Docker, CI/CD, and AI integrations using Gemini, Open AI, and Claude APIs.

TECHNICAL SKILLS

Languages: JavaScript (Expert), TypeScript, SQL

Frontend: React.js, Next.js, Redux, TailwindCSS, TanStack Query, shadcn/ui

Backend: Node.js, Express.js, MongoDB, REST APIs, GraphQL, JWT Auth, Redis, WebSockets

Cloud & DevOps: AWS (EC2, S3, CloudFront, Load Balancer), Docker, CI/CD, Vercel

Integrations: AI APIs (Gemini), Razorpay, Google Maps API, Cloudinary, Multer, Git, GitHub, GitLab, Postman, Agile/Scrum

EXPERIENCE

Full Stack Developer | Brain Inventory (via Turing)

August 2025 – Present

- Selected through Turing's top 1% global developer network and assigned to Brain Inventory for production-scale applications.
- Built 40% of the frontend architecture for DriveG, contributing 25+ reusable React components and 15+ API integrations.
- Reduced average page load time by 30% through lazy loading, API optimization, and component-level rendering improvements.
- Fixed 20+ critical production bugs in TableOpen, decreasing reported user issues by 35% and improving platform stability.
- Participated in 10+ code reviews per sprint and improved code quality, reducing regression issues by 25%.
- Worked in Agile teams of 6–8 developers and consistently delivered 95%+ of sprint tasks on time.

Software Development Intern | TechWalnut Innovation LLP

Jan 2025 – Jun 2025

- Owned 60% of frontend development for a Hospital Management System used across 5+ operational modules.
- Built 10+ reusable React components, reducing development effort for new features by 30%.
- Delivered a complete HRMS system with 15+ API endpoints and real-time data rendering for attendance, payroll, and employee management. Reduced manual HR processing time by 50% through dashboard reporting.
- Improved frontend maintainability by introducing modular architecture, reducing onboarding time for new developers by 40%. And Optimized application performance and reduced initial load time from 5s to under 3s.

Full Stack Developer Intern | (LOR) TDS Avenue CodeForge

Aug 2024 – Jan 2025

- Designed and implemented 20+ secure REST APIs with JWT authentication and role-based access control.
- Optimized MongoDB queries and schema design, reducing average API response time by 45%.
- Developed backend for FreshPicked supporting 3 user roles and concurrent access for 100+ users.
- Increased database efficiency by 35% through indexing, schema restructuring, and query optimization.
- Delivered 8+ production-ready features independently from wireframe to deployment.

PROJECTS

ColdMailerAi | 250+ Active Users | Gemini Api, MERN Stack |

[Live-link](#) [Github-link](#)

- Built an AI-powered cold email generator used by 250+ active users across students, freelancers, and sales professionals.
- Increased user retention by 30% through in-app editing, saved templates, and email history.
- Designed 12+ REST APIs and optimized concurrent request handling for 50+ simultaneous users.
- Reduced frontend API calls by 35% using TanStack Query caching and optimized state management.

EDUCATION

Government College of Engineering, Nagpur

B. Tech in Electronics & Telecommunication - **7.24 CGPA**

Nagpur, Maharashtra

Nov 2022 – May 2025
